

Jackson County Manure Application Setbacks

Livestock manure shall be applied at rates not exceeding local agricultural crop nutrient requirements. Those requirements are available from the Soil Conservation Service or the Agricultural Extension Service.

Minimum setback requirements for application of animal waste to prevent odor nuisance and potential non-point pollution are as follows:

	Surface or Irrigation Applied	Immediate Incorporation or Injection Required
Watercourse, streams, rivers, lakes, wetlands, public or private drainage ditches	300'	100' OHWL
Municipal well	1,000'	1,000'
Private well	200'	200'
Public road right-of-way	100'	-0-
Residential area (10 or more homes) or municipality	300'	200'
Residence, church, cemetery or neighboring resident	300'	200'
Property line	10'	-0-
10 year floodplain	Prohibited	Prohibited
Field tile intakes	300'	10'
Where appropriate topography exists (sloping away from watercourse) the application of animal manure may be closer than required setbacks by approval of the County Feedlot Pollution Control Officer but not to exceed MPCA guidelines.		
Shall use proper etiquette when applying animal manure.		

Manure Spills Must be Reported
