## JULY CONSTRUCTION STATUS

Due to optimal weather conditions Svoboda was able to complete the base scope of the project in a 2-month span, wrapping up construction on June 27<sup>th</sup>, 2022.

Swenson seeding was subcontracted to seed all disturbed areas, side slopes, and 16.5' buffer strips throughout the project. Side slope seeding consisted of erosion control blanket and type 8 mulch. The buffer strips were seeded with a buffer blend and type 4 mulch. There is already a substantial amount of vegetation growing from the seeding. Swenson completed seeding and site stabilization on June 29<sup>th</sup>, 2022.

Svoboda Excavating recently returned to the site to install two Alternative Side Inlets (ASI's). These side inlets were put in to help drain surface water in low spots that were affected by construction during the project. Svoboda also fixed a few areas that had sloughed due to the recent heavy rains. The slopes were pulled back and reshaped and these areas will be seeded soon to prevent any further sloughing.

Vegetation continues to establish on the side slopes and buffers throughout the project area. ISG and Jackson County will continue to monitor the project over the upcoming weeks and will update with any new issues.

## PROJECT CONTACTS

PROJECT ENGINEER

Chuck Brandel, ISG

Civil Engineer

(507) 327-8282

[Chuck.Brandel@isginc.com](mailto:Chuck.Brandel@isginc.com)

PROJECT MANAGER

Chris Adams, ISG

Project Manager

(507) 387-6651

[Chris.adams@ISGInc.com](mailto:Chris.adams@ISGInc.com)

CONSTRUCTION FIELD REP

Jared VanRyswyk, ISG

Construction Administrator

(507) 340-1801

[Jared.VanRyswyk@ISGinc.com](mailto:Jared.VanRyswyk@ISGinc.com)

PRIME CONTRACTOR

Paul Fishel

Vice President

(507) 227 1474

[seipaul@questoffice.net](mailto:seipaul@questoffice.net)

DRAINAGE AUTHORITY

Dave Macek, Jackson County

Drainage Inspector

(507) 841-0350
